SUMMARY

I am a statistician, data visualizarion enthusiast, R lover and active user. I like statistical modelling in general, package and dashboards development, text mining and web scraping. I am specially interested in machine learning alghoritms and feature extraction. I have a project for teaching R at the statistical department of my university. I also developed an introduction book to R and won an 'outstanding project award' on account of my scientific initiation project. I have a strong background in statistical consulting, mainly in the academic field, being even the president of the statistical junior enterprise at my university.

Skills: Web Scraping, Machine learning, Data visualization, Text-mining, Statistics

Tools: R, SAS, SQL, Python

EDUCATION

- Bachelor degree in Statistics - State University of Maringá (2015-2019).
